

The Argumentation Paper

For your third essay you will be writing an argumentative research essay on one of the argument pairs in *Subject & Strategy*. In this essay, you will need to cite from **both** of the essays in the set and from **two articles** gathered during library research.

Pick from the following argument pairs:

Does a healthy career equal an unhealthy marriage? (507-516)

Should English be the law? (517-534)

Is genetically engineered food safe? (535-549)

Your paper should be at least 1,250 words and, for a passing grade, is required to have citations from both articles in *Subject & Strategy* and two outside sources. Your paper should be titled, include page numbers inserted in the top right corner (lastname_pagelnumber), double spaced, and include a works cited page that documents all of your sources correctly.

Your papers will be due on June 25th at midnight to my email. If you are submitting a rough draft, please send it to me by the 21st.

Please make sure you are giving yourself enough time to do the library research for this paper. If you have any questions or want to run an approach to writing this essay by me, feel free to get in touch via email or schedule a time to meet with me on campus.
