

Presentation Handout

We will be spending part of a class doing presentations about our final papers. This will give students an opportunity to share their work with colleagues and classmates, plus begin to grow accustomed to the presenting in front of classes. You must be present for the day you are speaking or you will receive a zero. Your presentations should be about five minutes in length. Try not to go any longer. I would like you to cover:

- Your topic: Briefly summarize your research
- What approaches worked for you
- What approaches did not work for you
- Problems you encountered which you were able to get past

Presentations will be during class on August 23rd
